

Example Response to Copilot Bio Prompt

Here is a draft of your professional biography based on the provided resume. If any additional information is needed, it is listed below.

My name is Morgan Elizabeth (Liz) Neilson, and I recently earned a B.S. in Industrial and Systems Engineering from Virginia Tech. My passion lies in industrial engineering, particularly in manufacturing, cost analysis, and occupational safety. Throughout my academic journey, I have cultivated skills in cost analysis, plant layout design, and inventory control, and I have hands-on experience with tools such as AutoCAD, SAS, and FactoryCAD.

Beyond academics, I served as Project Manager for a Senior Design Team, where I spearheaded facility layout improvements for Omega Window Co. My professional experiences include internships at Perkins Company, Naval Air Systems Command, and Cuyahoga Foods, where I applied my technical skills to real-world challenges. As a member of the Society of Manufacturing Engineers and a proud participant in the Marching Virginians and Metro Pep Band, I value collaboration and teamwork both in and outside of the classroom.

When I'm not pursuing engineering challenges, you'll find me immersed in music, whether performing with the band or exploring new genres. I also enjoy outdoor adventures and spending time with friends and family. As I move forward, my goal is to secure a role as an industrial engineer where I can contribute to improving efficiency and safety in manufacturing environments.

Additional Information Needed:

1. A photo, if desired, and instructions for including it.
2. Hobbies or interests outside of school beyond music (e.g., sports, reading).
3. Confirmation of career intention (specific industries or companies you're targeting).
4. Any social or community activities not listed in the resume.
