

Recommendation Website Proposal

Language Expectation: You can answer these questions informally. As long as I can read and understand your response, it is fine. I am not paying any attention to your grammar or punctuation.

Length Expectation: Short answers are fine, as long as they are clear and specific. Aim for an answer that is at least the maximum length of a Tweet, which is 280 characters. There's no problem if you run over.

1. Tell me the website you have chosen for your recommendation report so that I can confirm that it will work for the projects. List both the name of the site and the link so that I can visit the site.
2. Tell me why you have chosen this website. I want to know a little about your motivation and interest in the site or in the business, nonprofit, or organization.
3. Identify the kind of site you have chosen. You should select a website for a small business, nonprofit, organization, or other group. Do NOT choose local franchises or branches of national or international businesses since they typically use an organization-wide design.
4. Where is the business or organization located geographically? You need to choose a website for a business or group that is located in Blacksburg, Christiansburg, or Montgomery County—all in Virginia. This area includes the Virginia Tech campus.
5. List the titles of the pages on the site. You need at least 8-12 pages of content for this project. If the site does not have enough pages, choose something else.
6. If there's anything else that you want me to know about your topic or any questions that you want to ask, include those below.
