

# Transcript for “Community Solar Panels”

## Benefits and How to Join

### **1. What is Community Solar?**

A shared renewable energy source that can be joined through subscription. It provides access to clean energy without installing solar panels on your home.

### **2. How does it Work?**

The solar panels will capture sunlight and then generate electricity from this captured sunlight. This energy will then go into the local power grid. By using this energy it lowers your electric bill.

### **3. Who Can Join?**

Anyone can use this energy if they subscribe. It is made to include people who might not be able to get solar energy otherwise. Mainly for people who care about clean energy or want to lower their bills.

### **4. Benefits for you and the community.**

By using community solar panels, you can save up to 20% on your electric bill. It would also create more jobs and lower pollution in the community. Also there's no upfront cost or the actual installation.

### **5. How to Get Started?**

Check the availability of solar energy in your community. From there choose the best subscription for you household energy intake. Then sign up for the subscription and start saving money through bill credits.
