

AI Prompt to Check Your User Document

I am creating a one-page learning aid or visual glossary for non-expert employees to use as a quick reference while creating and revising workplace documents. I am uploading my draft. Please help me check it against the criteria below, but **do NOT make any changes or revisions to the document**. Tell me how well the document meets each criterion and identify specific areas I should consider revising.

Assignment Requirements

My document is a one-page learning aid or visual glossary for Caldwell & Associates employees. It focuses on a small, coherent group of related concepts about plain language, accessibility, or document design.

Content & Practical Usefulness

My document gives readers accurate, relevant information that helps them understand and apply the concepts to workplace documents, rather than simply providing definitions.

Audience Awareness

My explanations, examples, and presentation are appropriate for non-expert employees who will use the document as a quick reference while creating and revising workplace documents.

Visual Communication

My document meaningfully combines visuals and explanatory text. The visuals help explain or reinforce the concepts rather than simply decorate the page, and they are placed near the information they support.

Organization & Usability

My document uses headings, lists, white space, chunking, and other visual cues to organize related information and help readers quickly find what they need.

Document Design

My document uses contrast, repetition, alignment, and proximity (CRAP) to create a clear visual hierarchy. Headings, typography, spacing, and layout make the page easy to scan and use.

Plain Language

My document uses concise, concrete, reader-friendly language. I have avoided or explained unfamiliar jargon and broken information into manageable chunks.

Accessibility

My document uses readable typography, appropriate font size and alignment, high color contrast, and other design choices that support accessibility. Important information does not depend on color or visuals alone.

Formatting, Sources & Submission

My document uses the required page size, portrait orientation, margins, spacing, paragraph formatting, font, and heading hierarchy. I have documented any borrowed information or visuals, and my final document is ready to submit as a PDF.

Review my draft based on these requirements. For each criterion, explain whether it appears to meet the requirement and point to specific evidence from my draft that supports your assessment. If a criterion needs attention, explain what I should consider changing and why.

Remember to provide revision suggestions only. Do not rewrite, revise, or provide replacement language for any part of my draft.
